

First, launch a study on the roads to be widened

Roads are all clogged. So widening is needed for the common good. But those losing their precious property should be adequately compensated and not harassed.

Arvind V
Astrologer

Roads are to be widened. But BBMP engineers are in the dark about which roads to be widened and how much. People should demand a public study on the roads to be widened.

Smitha K
Commerce student

Don't widen the roads. If the Metro issue had not come up, there was enough space to keep the traffic moving. Traffic police are lazy and they allow motorists to behave as they please.

Shijin K
BPO executive

Widen roads by all means. But the plan should be transparent. BBMP can post it on their website for everyone to see. It is resorting to manual labour only to fool the public.
